| Leadership Message

LumeLuxe Solutions

"Lighting is the silent language of architecture. After 23 years in the industry, I have seen how precision can transform a space into a living environment. We deliver data-driven, sustainable light-scapes."

Syed Tabish Junaid

General Manager

Syed Tabish Junaid brings over two decades of technical sales and leadership experience, having executed landmark projects for the region's most prominent developers and industrial authorities.

A Vision of Excellence & Innovation

CORPORATE OVERVIEW

Trusted Presence

Headquartered in the UAE with strategic operations in Pakistan and Oman, providing seamless cross-border logistics and technical support.

Innovation Led

Focusing on high-performance LED technology, smart controls, and IoT-enabled systems that reduce carbon footprints.

Full Lifecycle

We bridge the gap between architectural vision and industrial-grade reliability, from design to post-installation maintenance.

A Vision of Excellence & Innovation

| OUR STRATEGIC CORE

Our Mission

To provide innovative, sustainable, and high-quality lighting solutions that enhance the functionality and beauty of every infrastructure we touch.

Our Vision

To be the global authority in specialized lighting, recognized for our commitment to engineering integrity and aesthetic excellence.

A Vision of Excellence & Innovation

www.lumeluxe.ae | info@lumeluxe.ae | +971 56 1666 349

| OUR END-TO-END SOLUTIONS

Consultancy & Design

Utilizing DIALux for precise Lux calculations, 3D modeling, and energy-efficiency audits to ensure code compliance.

Specialized Supply

Direct procurement of premium luminaires, marinegrade fixtures, and bespoke decorative pieces from worldclass manufacturers.

Expert Installation

Certified electrical engineering teams capable of managing high-mast deployments and intricate interior fit-outs.

A Vision of Excellence & Innovation

ENGINEERING RIGOR

LumeLuxe Solutions leverages a data-driven approach to every installation. We don't just provide lights; we solve lighting challenges with technical integrity. Our engineering process combines advanced modeling, energy analysis, and compliance assurance to deliver lighting solutions that enhance performance, efficiency, and user experience across every project.

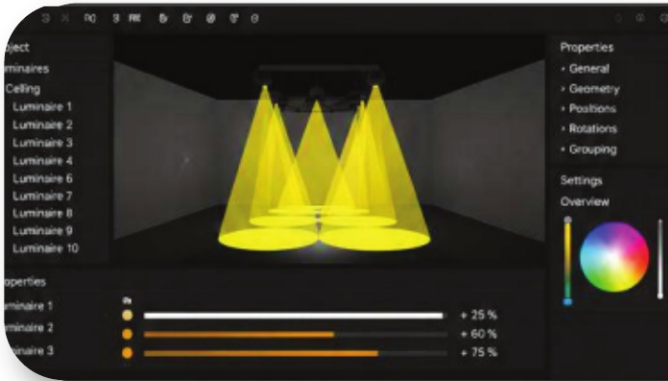

DIALux & Relux Modeling:

Accurate simulations of light distribution.

Energy Audits:

Analyzing ROI for LED retrofitting projects.

Compliance:

Ensuring accurate illumination levels in line with project lighting requirements

A Vision of Excellence & Innovation
